

# How to sort your business's waste

## This is food waste

Bread, pasta,  
rice

Vegetables, fruit  
(max 10 kg windfalls)

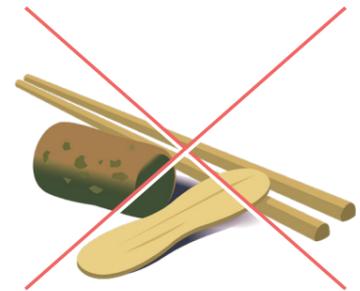

Fish, meat that  
you have cooked

Tea leaves, tea bags,  
coffee grounds, filters,  
undyed paper towels

Don't forget to remove packaging and plastic around the food.

## This is NOT food waste

- Biodegradable plastic bags
- Flowers, pots of herbs or lettuce
- Dishrags
- Food in packaging
- Ice cream sticks, wooden skewers, chopsticks
- Soil
- Serviettes with printing or colours
- Butter tubs

- Large amounts of shells from eggs and shellfish\*
- Large bones\*
- Snus, cigarettes, ash
- Strings, gloves
- Rubbish, rubbish bags
- Stearin candles
- Wine corks, bottle caps

\*Large bones and large amounts of shells ruin the conversion to biogas

## What to do

- Place the included paper bag in the bin. Rinse out and clean the bin regularly.
- Do not fill the entire paper bag with food waste. Leave at least 25 cm from the top edge. The bin must not weigh more than 60 kg.
- Store the bin in a cool place, preferably well into the room. This reduces the risk that people will discard other waste in it.
- Improperly sorted food waste will not be picked up. Place it in the regular rubbish or request an extra pick-up.
